

MPI-C, MPI-CN

Multichannel electronic recorder

- 16 or 8 universal analogue measurement inputs
- 4 or 2 PULS type inputs
- 16 math channels & functions (+, -, /, *, √)
- User configurable data presentation, the colour TFT display
- USB port on the front panel (IP54)
- Advanced data logging, recording data to the text files, 2 GB internal data memory
- Alarm & control functions, 8 solid state relays (SSR)
- Tracking min., max. and average – for process values
- RS-485 port – Slave (Modbus RTU, ASCII protocols)
- Ethernet port (Modbus TCP protocol, web server – on-line visualization of process values)
- GSM module (option)
- Dedicated PC software for commissioning and archive data visualization
- Available languages: EN, DE, FR, PL

MPI-C and MPI-CN devices are multichannel microprocessor measuring instruments. Data are recorded and can be read locally or periodically using a USB mass storage device.

Sixteen or eight universal measurement inputs can measure process signals in industrial applications and may be used to measure physical values processed into a standard signals, e.g. temperature, humidity, pressure, flow, level, chemical parameters, etc. Four or two PULS type inputs can measure flow and state.

Device can communicate with master system via Ethernet port (Modbus TCP protocol, www server) or via RS-485 port (Modbus RTU and ASCII protocols) and can work in distributed control systems.

Device may be configured by the user from the front panel or using commissioning software on PC.

RECORDING MEASUREMENT RESULTS

- Archivization of process values (recording rate from 3 s up to 24 h)
- 2 recording rates, toggled by alarm state for shorting/opening time of selected binary inputs (the option of setting a break in archiving)
- Archivization of max. 15 totalizers (record every 15 min)
- Archivization of events: authorization log file, event log file (recording after the occurrence of the event), settings log
- Checksum secured files – protection against data manipulation
- Recording to internal memory of 2 GB, max. 256 files
- Access to recorded data through the USB port on the front panel or through the Ethernet port

INPUTS AND CHANNELS TYPES

MPI-C/MPI-CN has: 16 or 8 universal measurement inputs, 4 or 2 PULS type inputs, RS-485 port – Slave and Ethernet port. In addition, 16 math channels are available, which calculate the implemented formula. Up to 16 User's characteristics can be defined.

Input or Channel type	No.	Description
Analogue input (RTD/TC/I/U/ /resistance)	16 or 8	for RTD temperature sensors (Pt100, Pt200, Pt500, Pt1000, Ni100, Ni1000); TC sensors J, L, M, T, U, E, N, B, R, S; transducers with standard current loop output 0/4-20mA; transmitters with an output resistance in the range 0 .. 5000 Ω or converters with voltage output of -0.8 V ... 0.8 V the inputs are galvanically isolated from each other; digital filter with selectable time constant allows the measurement of noisy signals
PULS type input	4 or 2	frequency measurement mode in range 0.001 Hz .. 10 kHz, on/off state tracking
Math channel	16	calculation of the formula entered by the user (available mathematical operations: addition, subtraction, multiplication, division, extract the root)

TOTALIZERS

- Totalizers for flow measurements (2 for each channel)
- Totalizers can be reset manually or automatically every day, week or month

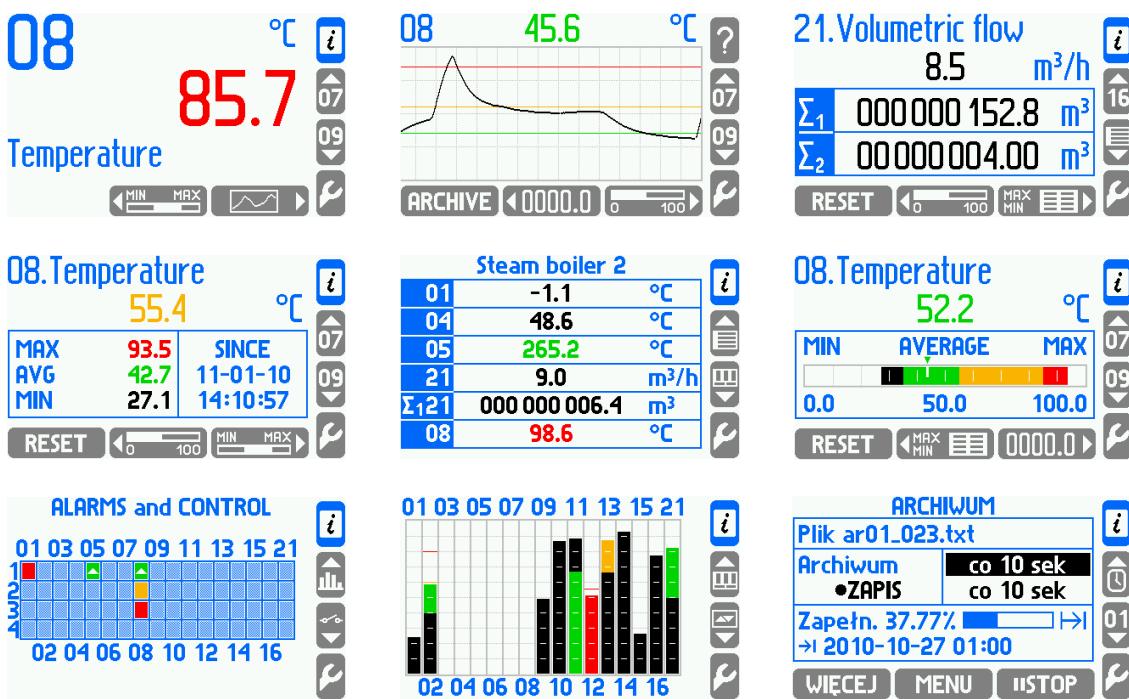

ALARMS AND CONTROL

- 4 alarm thresholds for each result
- Alarm/control mode
- 8 solid state relays rated at 0.1 A/60 V
- Option of informing about the alarm via SMS (optional GSM module connected to the RS485 port)

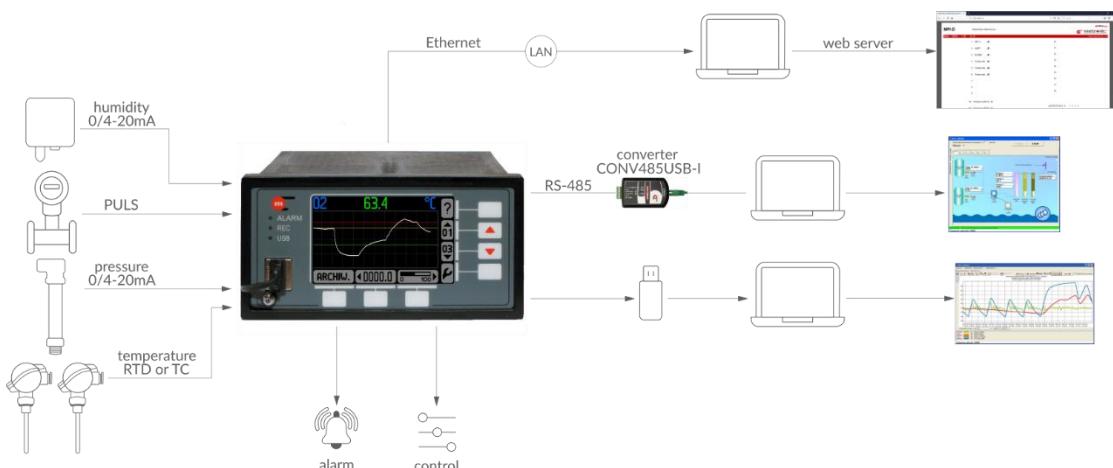

DISPLAYING RESULTS

- 6 optional screens for each channel: large digits, trend graph, bar graph, totalizers values, minimum and maximum values (digits), minimum and maximum values (bar graph)
- 6 collective screens with tables (3 or 6 rows in each table) to display current values or totalizers values
- 6 optional additional screens: collective table with channels values; collective bar chart; collective information about exceeded thresholds; status of relay outputs; the current date, time and day of the week; status of the archiving process, usage indicator, recording interval
- Possibility of screens auto-browse
- Dimmed backlight the screen after a specified time
- Three indicator LEDs on the front panel
