

Characteristics

0040 - SOFTWARE - MVS - GATEWAY - SERVER -

- Function:	Measured value visualization Configuration of MVS-DR Configuration of MVS-HD
- Requirements:	MacOS / Linux / Win7 - Win10 min. 100 MB HDD storage
- Value indication:	Table (with CSV-export) Diagram Live Graphical (configurable)

Technical Data

System Requirements

Operating system:	MacOS, Linux, Windows7 up to Windows10
Devices:	MVS-DR, MVS-HD
HDD storage:	min. 100 MB

Performance Parameters

Functions:	Measured value visualization Configuration of MVS-DR and MVS-HD gateway servers Receival and storage of measured values For functions <i>limit value exceeded</i> and <i>low sensor battery level</i> : Message per e-mail
------------	---

Measured value indication:	Table (A CSV-export of measured values is possible.) Diagram Live Graphical (with individually configurable graphics)
----------------------------	--

Applications

The MVS software allows visualization of measured values received by the radio-gateway-servers MVS-DR and MVS-HD. The software is also suitable for configuring the radio-gateway-servers. MVS is browser-based and compatible to every current browser. The MVS software is executable under most Windows-systems as well as under MacOS and Linux.
