## ● Technical Data

### Input

Sensors:	4, 8, 12 inputs:	analog or digital, freely usable
Supply:		internally or externally
Current:	Range:	4...20 mA, 0...20 mA
	Resolution:	0,0001 mA
Voltage:	Input resistance:	33Ω
	Range:	0...1 V
Voltage:	Resolution:	0,05 mV
	Input resistance:	100 kΩ
Voltage:	Range:	0...10 V, 0...30 V
	Resolution:	0,5 mV
	Input resistance:	100 MΩ
RTD:	Sensor:	Pt100, Pt1000
	Range:	-200...850 °C
	Resolution:	0,1 °C
Pulse:	Pulse length:	100 µs minimum
	Frequency:	0...1 kHz
	Voltage:	30 V maximum
Interface:	RS485:	Modbus RTU
	Option:	other interfaces on request
Semiconductor:	KTY81	

### Output

Switching contact:	Relays:	4x changeover (freely programmable)
	Contacts:	230 VAC, 6 A
Sensor signal:	Function:	Alarm management, collective alarm
	Analog current:	looped (sensors with own signal output)
Interface:	Network:	The sensor signal is used for the DLUI-HD and e.g. for a SPS
	RS485:	TCP/IP RJ45 plug contact
	USB:	Modbus RTU
		stick, cable

## ● Applications

With its functionality, the intelligent chart recorder and data logger DLUI-HD is suitable for all applications where measurement data has to be displayed and recorded continuously.

## ● Technical Data (Continued)

### Accuracy

Sensors:	see specification of the sensor
Data logger DLUI-HD:	
Current:	±0,003 mA, ±0,05%
Voltage:	0...1 V: ±0,2 mV, ±0,05% 0...10 V, 0...30 V: ±2 mV, ±0,05%
RTD:	Pt100: ±0,2 °C (-100...400 °C) Pt1000: ±0,3 °C (other ranges) Pt1000: ±0,2 °C (-100...400 °C)

### Supply

Voltage:	Standard: 100...240 VAC, 50-60 Hz Option: 24 VDC
Sensor supply:	1 integrated power unit: 24 VDC, 25 W, 130 mA max. for each sensor (at 4 inputs) 2 integrated power units: 24 VDC, 25 W, 130 mA max. for each sensor (at 8, 12 inputs)

### Environmental Conditions

Temperature:	Operation range: 0...+50 °C Storage: -20...+70 °C
--------------	--

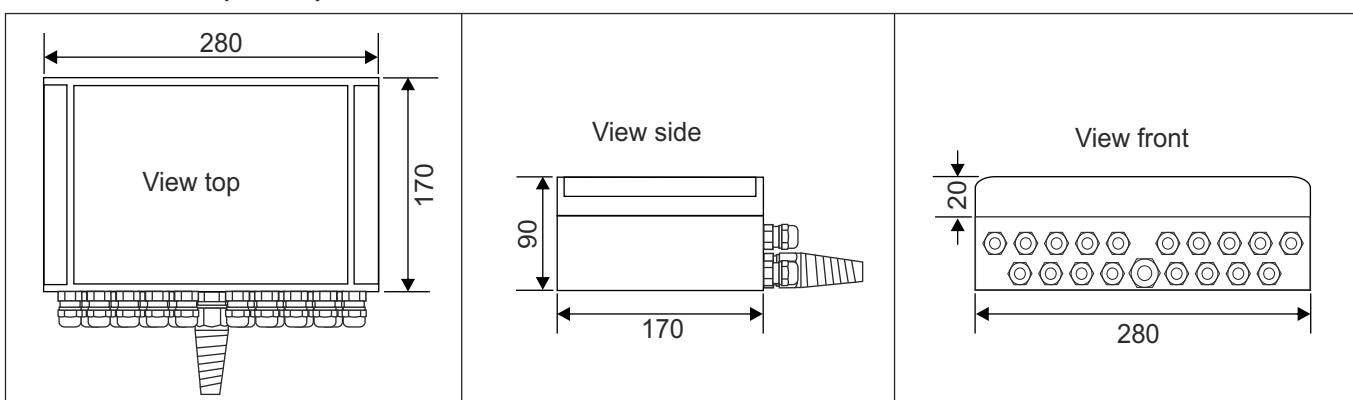

### Mechanics

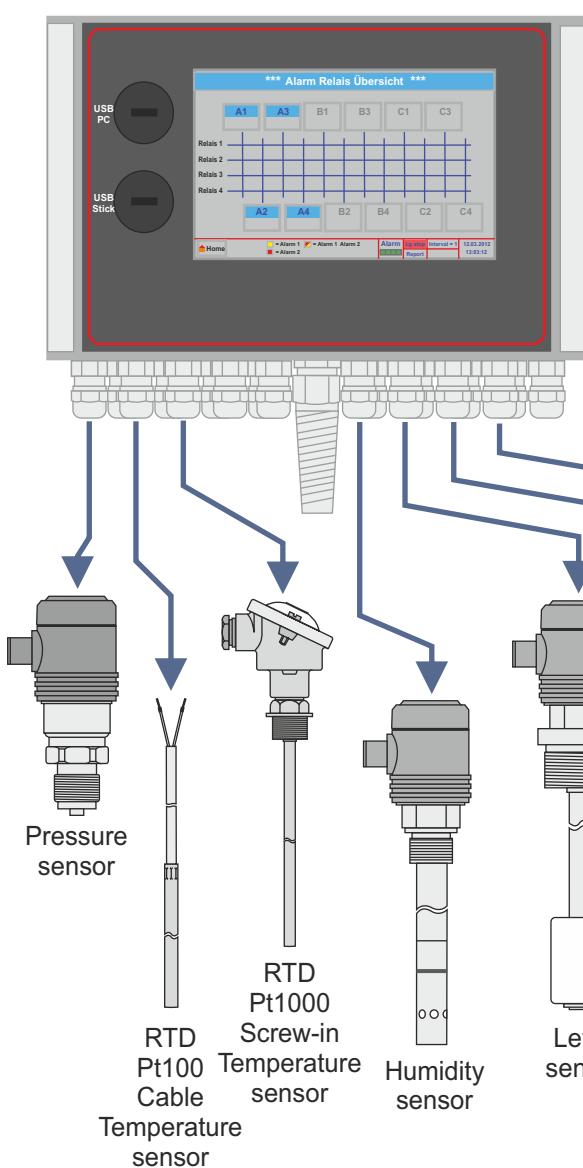

Casing:	Type: aluCase AC with clip-on design covers Dimensions: 280 x 170 x 90 mm Material: diecast aluminium Mounting: covered screw channels Colour: aluminium white Front foil: Polyester Weight: ca. 3,5 kg (with options) Cable input: 18 screw connections PG12 (sensors, supply, alarm relays) 1 screw connection with bend relief (RJ45 Ethernet)
Display:	Size: 7" Type: TFT transmissive Use: Graphik, curves, statistics Menu languages: German, English
Protection class:	IP65
Electrical connection:	Plug-in terminal strip: 0,2...2,5 mm <sup>2</sup> (supply, relays) Plug-in terminal strip: 0,14...1,5 mm <sup>2</sup> (sensors, interface)
Memory card:	SD memory: 2 GB (standard) Option: up to 4 GB

### Options

Webserver  
Software for data evaluation (PC version)  
Software for data evaluation (Client/Server version) for 5, 10 or 20 DLUI-HD

### ● Dimensions (in mm)

## Versatility

Up to 12 sensors can be connected to the device. All sensor inputs are freely to use and each sensor is supplied with 24 VDC / 130 mA .

## Flexibel

The data logger is network compatible, together with the integrated webserver, this makes worldwide data transmission possible.

## Alarm relays and fault message

Up to 32 threshold values can be configured freely and allocated to 4 different alarm relays. These can be used for collective alarms.

### Other sensors

- with RS485 Modbus RTU
- with 0(4)...20 mA
- with 0...1 (10) V
- with pulse output

## ● Representation Possibilities

A1 Hall 1.1 Plant Air	A2 Hall 1.2 Plant Air	A3 Hall 1.3 Plant Air	A4 Hall 1.4 Plant Air
Flow Usage 237,7 m³/h 34006 m³	Flow Usage 729,7 m³/h 13423009 m³	Flow Usage 537,7 m³/h 155006 m³	Flow Usage 254,7 m³/h 55234006 m³
B1 Hall 1.1 Nitrogen	B2 Hall 1.2 Nitrogen	B3 Hall 1.3 Nitrogen	B4 Hall 1.4 Nitrogen
Flow Usage 337,7 m³/h 24009 NI	Flow Usage 657,7 m³/h 234006 NI	Flow Usage 15,7 m³/h 34006 NI	Flow Usage 237,7 m³/h 234006 NI
C1 Hall 1.1 Oxygen	C2 Hall 1.2 Oxygen	C3 Hall 1.3 Oxygen	C4 Hall 1.4 Oxygen
Flow Usage 17,7 m³/h 4009 NI	Flow Usage 37,7 m³/h 234006 NI	Flow Usage 223,7 m³/h 3406 NI	Flow Usage 75,8 m³/h 43554 NI

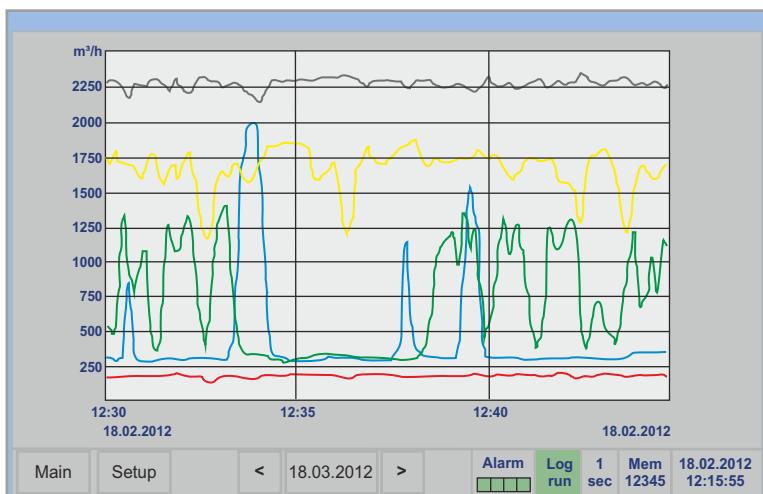

(Example)

## Real time measured values

All measured values can be seen at a glance. Threshold exceedings are indicated in red colour.

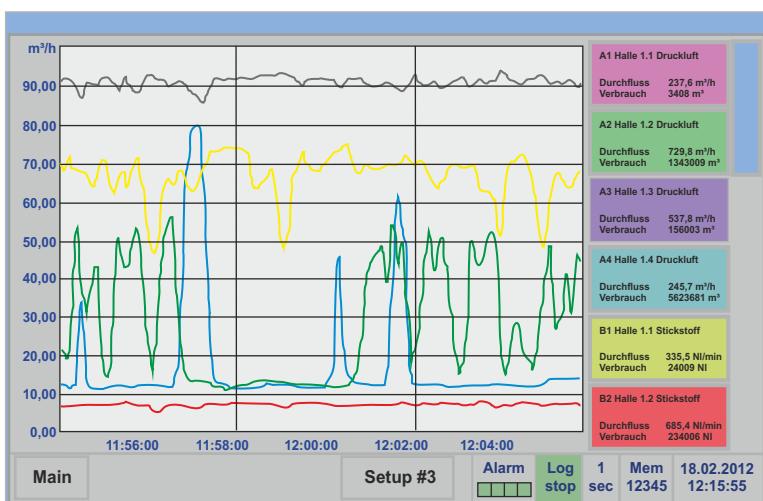

A „measuring site name“ can be allocated to each sensor.

## ● Representation Possibilities (Continued)

### Graphic display

This display replaces former evaluation of ordinary paper chart recorders and offers lots of advantages. The time axis can be moved by a finger slide. The „zoom function by finger movement“ enables an analysis of outliers.

### Real time measured values and graph

Both measurement curves and actual values are indicated.

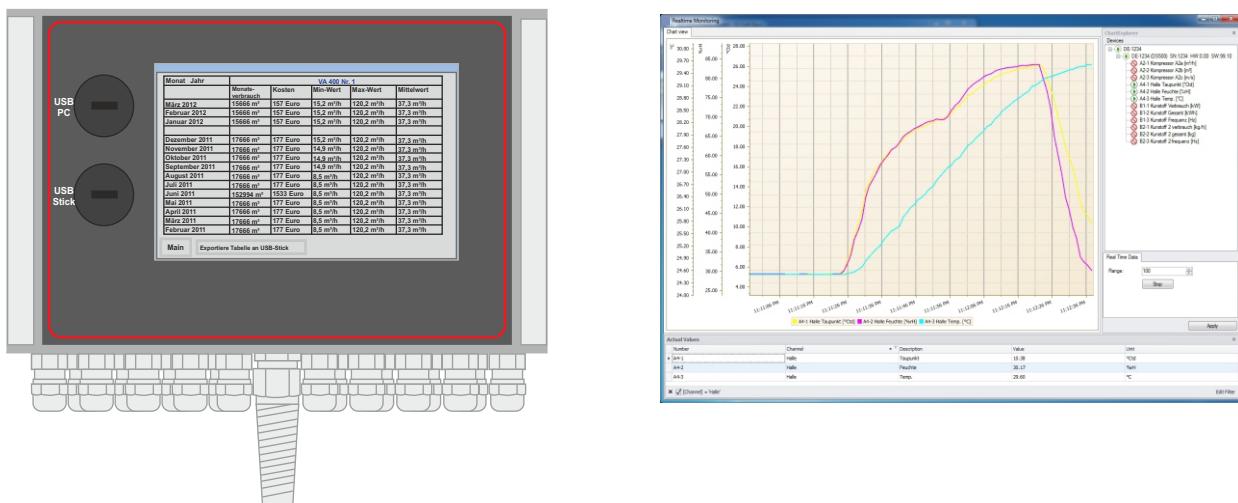

Monat Jahr	VA 400 Nr. 1				
	Monatsverbrauch	Kosten	Min-Wert	Max-Wert	Mittelwert
März 2012	15666 m³	157 Euro	15,2 m³/h	120,2 m³/h	37,3 m³/h
Februar 2012	15666 m³	157 Euro	15,2 m³/h	120,2 m³/h	37,3 m³/h
Januar 2012	15666 m³	157 Euro	15,2 m³/h	120,2 m³/h	37,3 m³/h
Dezember 2011	17666 m³	177 Euro	15,2 m³/h	120,2 m³/h	37,3 m³/h
November 2011	17666 m³	177 Euro	14,9 m³/h	120,2 m³/h	37,3 m³/h
Oktober 2011	17666 m³	177 Euro	14,9 m³/h	120,2 m³/h	37,3 m³/h
September 2011	17666 m³	177 Euro	14,9 m³/h	120,2 m³/h	37,3 m³/h
August 2011	17666 m³	177 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h
Juli 2011	17666 m³	177 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h
Juni 2011	152994 m³	1533 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h
Mai 2011	17666 m³	177 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h
April 2011	17666 m³	177 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h
März 2011	17666 m³	177 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h
Februar 2011	17666 m³	177 Euro	8,5 m³/h	120,2 m³/h	37,3 m³/h

### Statistics and reports

In difference to ordinary chart recorders the DLUI-HD offers not only measurement data logging, but also the evaluation of all consumption sensors as daily, weekly or monthly report at the push of a button. It is no longer necessary to read out the counter and transfer the values manually into a list. The reports can be imported into Excel on every PC via USB stick. After import they can be printed out without any additional software.

## ● Flexible Data Transfer for Each Application

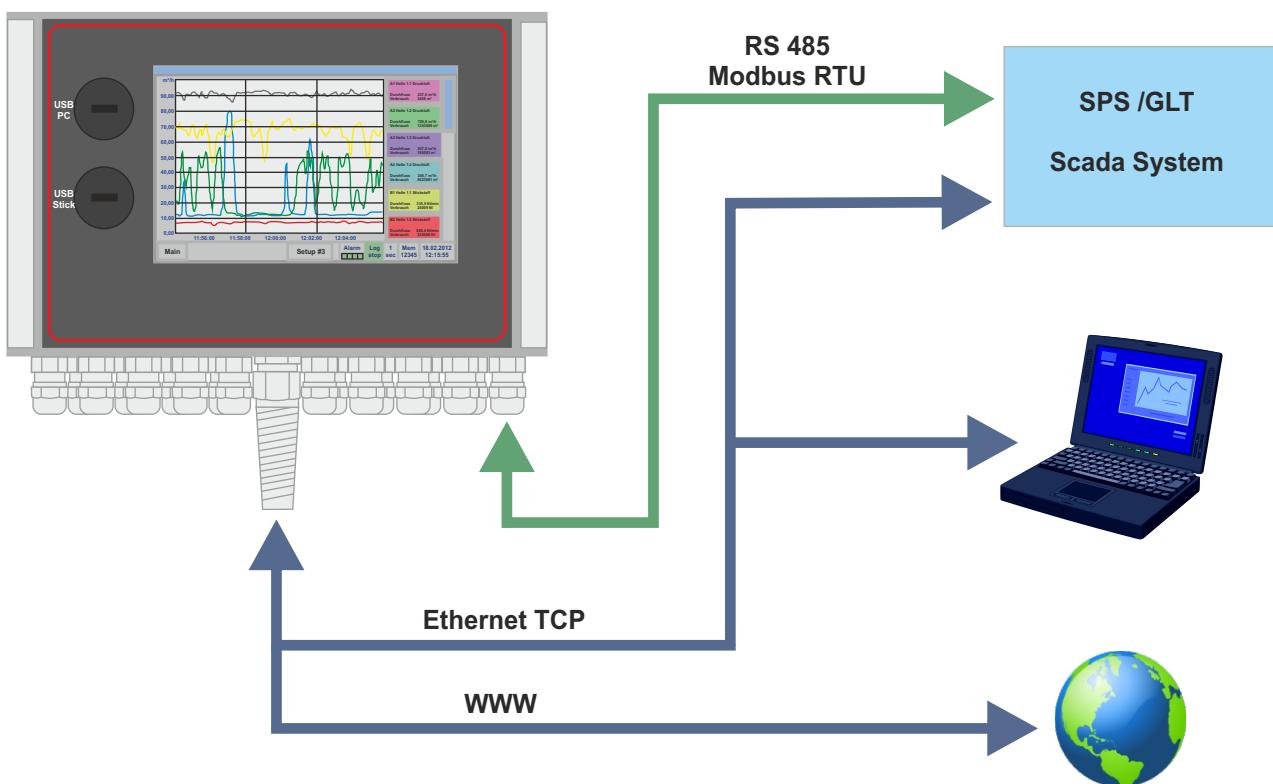

Data transfer via USB stick or USB cable

If no Ethernet- or Bus connection exists or if the installation would be too costly the recorded data can be stored onto an USB stick and transferred to the PC.

The DLUI-HD will automatically identify the USB stick. The user will be guided through the menu „Read-out data“. The data stored in the USB stick can be evaluated comfortably at the PC via software.

**Data transfer, remote maintenance and consumption analysis via webserver and integrated Ethernet interface, RS 485 Modbus RTU**

The current measured data and the stored measured data can be transferred via Ethernet or RS 485 (Modbus)

The integrated webserver enables the user to read out the measured data via internet.

For the evaluation of the data at the PC the user has a comfortable and versatile software available. Threshold exceedings can be sent via SMS and e-mail.

The DLUI-HD can be connected via Ethernet / RS 485 to customers own systems (GLT, SPS, Scada).

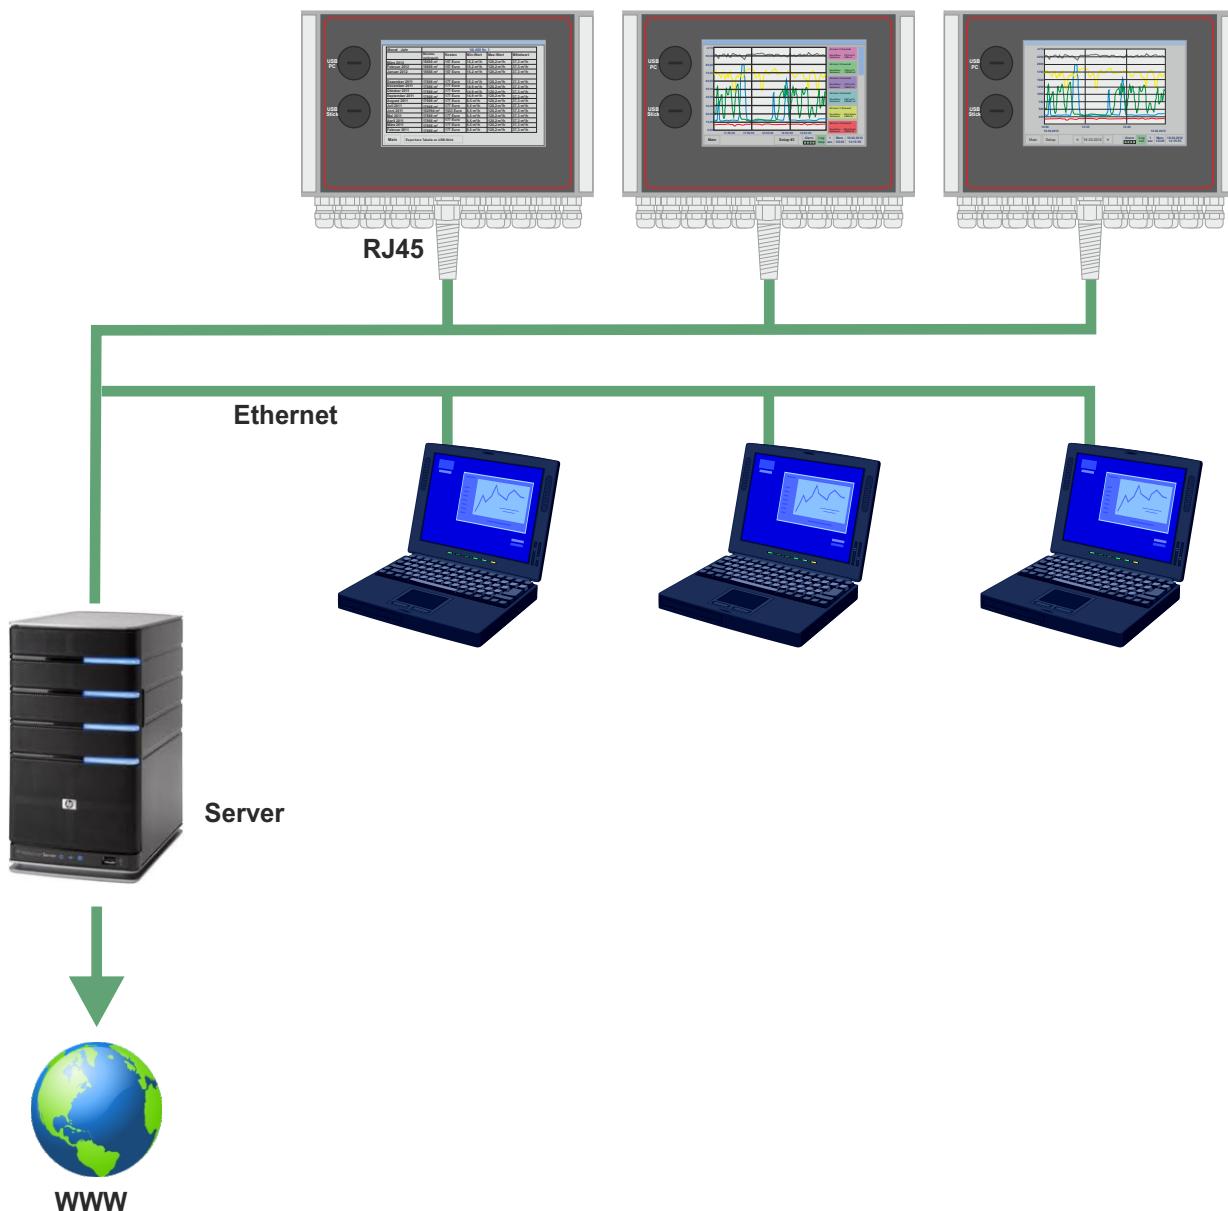

Via software the data can be evaluated comfortably.

As an alternative the webserver in DLUI-HD can be addressed via any web browser. Current measured values and consumption statistics can be transferred via the webserver.

## Client Software / Server Solution

### Transparent measurement data any time at any PC

Via client / server software solution an optional number of DLUI-HD devices can be evaluated via Ethernet. The software stores the measured data of all DLUI-HD cyclically (cycle time freely adjustable) in a SQL data base on the server. In case the stored alarm values are exceeded, the software automatically sends a SMS or an email. Furthermore, different user levels can be defined in the server so that single staff members only can access the measured data of certain DLUI-HDs. The evaluation of the measured can be carried out via client software from each PC within a company.

#### Server Software Function

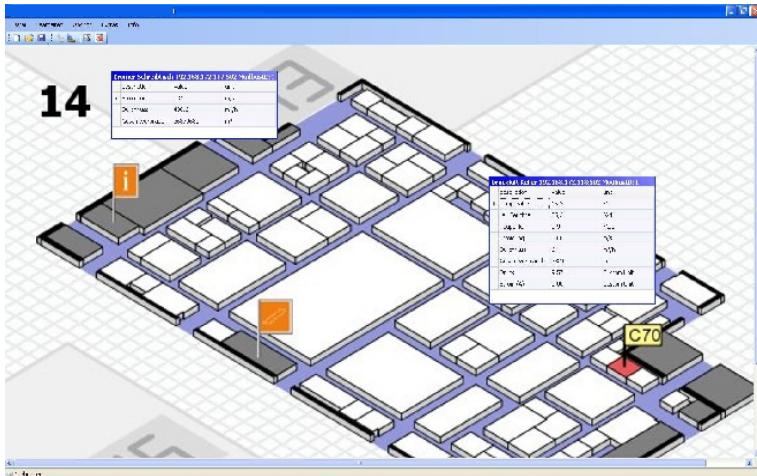

- Automatic data storage in My SQL data base (cycle time freely programmable)
- User administration
- Configuration of alarm message and transmission via email and SMS
- Configuration backup generation

#### Client Software Function

- Indication of current measured values
- Graphical chart with zoom function
- Tabulated representation
- Report generation (standard report with min/max values, number of alarms, alarm point of time)
- Automatic consumption report

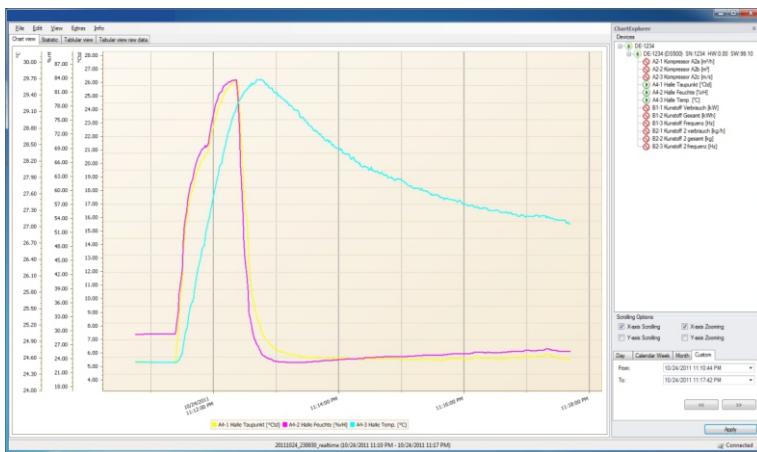

## More Device Details

### View of current measurement values

- Load background image
- Place / fix window with measurement values
- Red measurement values in case of alarm
- Quick access to measurement history

### Graphical chart with zoom function

- Selection of the measuring channels to be indicated
- Easy zoom-in and zoom-out
- Up to 8 Y-axis
- Quick access to: day view  
week view  
month view

### Consumption analysis

			Einheit	Jan 11	Feb 11	Mrz 11	Apr 11	Mai 11	Summe 2011
