SOLUTIONS

OUR GREEN MISSION

Our mission is to showcase the transformative power of these green energy solutions, as they provide a cleaner, more efficient future for process automation, reducing carbon footprints while propelling us towards a greener and sustainable tomorrow.

OUR PACKAGING CHOICES

In 2024 we have introduced recyclable tape to all of our outgoing packages. This is with a view to commit to fully recyclable packaging by 2025.

OUR OFFICE MEASURES

We have introduced energy saving and eco-friendly measures in our office space. Including energy saving lightbulbs, with a policy that these should be turned off when not being used. In addition to this, some lighting is activated by motion sensors. We also have multiple recycling bins around our office space to encourage recycling.

OUR EV OPTIONS

We are pleased to offer various Electric Vehicles to our team through our company car scheme. This is supported by offering electric charging ports at our office.

OUR GREEN ENERGY HUB

In 2024 we are proud to have introduced our Green Energy Hub, a testament to the never-ending desire to switch to green energy sources, offering tools that empower others to make informed choices and contribute to a greener, more energy-efficient world.
